DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of group I in the reply filed on 11/14/2007 is acknowledged.
2. Claims 3-4, 7-12, 15-16, 18-20, and 48 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/14/2007.
3. As a result of withdrawn and cancelled claims, claims 1-2, 5, 6, 13-14, 17, 21-25, 27, 30-32, 34, 35, and 49-51 are being examined in the current office action.

Priority

4. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

The later-filed application must be an application for a patent for an invention which is also disclosed in the prior application (the parent or original nonprovisional application or provisional application). The disclosure of the invention in the parent application and in the later-filed application must be sufficient to comply with the requirements of the first paragraph of 35 U.S.C. 112. See *Transco Products, Inc. v. Performance Contracting, Inc.*, 38 F.3d 551, 32 USPQ2d 1077 (Fed. Cir. 1994).

The disclosure of the prior-filed application, Application No. 60/431406, fails to provide adequate support or enablement in the manner provided by the first paragraph of 35 U.S.C. 112 for one or more claims of this application. There is no support for the elected group and species in the instant application. Hence, priority is only given back to 4/25/2003 (that given by 60/465583).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-2, 5, 6, 13-14, 17, 21-25, 27, 30-32, 34, 35, and 49-51 are rejected under 35 U.S.C. 102(e) as being anticipated by Berman et al. (US20060142265, published June 29, 2006, included in IDS, claims priority back to 60/455189, March 17, 2003). Claim 1 is anticipated by structure #1 of column 1 (from the top down) of table 3e and structures in table 3f (#1 of column 1 from the top down and #5 of column 2 from the top down) anticipate the elected group and species because variable R₂ is pyrido[2,3-e]-1,4-diazepine, variable A is benzofuran, and variable L is C₂-alkenyl. Claim 6 is anticipated because NR¹ is NH or NMe. Claims 13, 14, 17, 50, and 51 are anticipated because variable is benzofuran, which is a 9-membered bicyclic heteroaryl ring with one oxygen. Claims 21-23 are anticipated because each of these claims are compound claims. Claims 24-25, 27, 30-32, 34-35, and 49 are anticipated because these compounds can be made into compositions (page 51, paragraphs 0622 and 0623). In addition, the second compound mentioned in figure 3f directly anticipates the elected species. Hence Berman et al anticipate claims 1-2, 5, 6, 13-14, 17, 21-25, 27, 30-32, 34, 35, and 49-51.

The applied reference has a common assignee and inventor(s) with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by

Art Unit: 1624

a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claim 1 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6765005. Although the conflicting claims are not identical, they are not patentably distinct from each other because the specified claims contain overlapping subject material. In both sets of claims, benzofuran is a possible ring for variable A.

Allowable Subject Matter

9. No claims are allowed.
